

Space: Cost Overrun on the Aero propulsion Systems Test Facility: Plrd-82-123

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. GAO reviewed the reasons for the cost overrun on the Aero propulsion Systems Test Facility (ASTF) construction process and discussed the construction of the Space Transportation System (STS) support facilities with Air Force and Army Corps of Engineers officials to determine whether the design responsibilities for these facilities were split between the Air Force and the Corps in ways similar to the ways in which they were split on the ASTF. The ASTF was supposedly fully funded at 437 million in 1977 but, since that time, it has experienced a significant cost overrun, estimated at 138.4 million. The Air Force entered into the construction contract with a design that was not well suited to its revised procurement plan which provided for two concurrent procurements, one for construction and the other for the acquisition of equipment. Some of the equipment used created facility interface problems and required modification of the original design. In addition, the concurrent procurement resulted in numerous design omissions. While the Corps, as construction agent, performed a constructibility review, it was not funded to perform a design review. Inadequate...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Ally Reichel**

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You won't feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
