Comprehensive guide! Its this type of very good read through. It is actually written in simple words and phrases rather than difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

Karger Verlag Mai 2011, 2011. Buch. Book Condition: Neu. 210x134x23 mm. Neuware - Where do we come from Is our destiny determined by the genes we inherit Do we all see the same blue color when we look at the sky In this book Gottfried (Jeff) Schatz, the world-renowned biochemist, gives lucid - albeit often surprising - answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines. With passion, warmth and a keen sense of wonder, he draws on philosophy, cultural history and art to formulate his reflections on the mystery of life. The key to understanding life is to be found in its chemistry, and he proves that this is no dry endeavor and certainly not devoid of beauty. The result is a collection of eloquently and poetically written essays dealing with key issues in the natural sciences. It will appeal not only to scientists, but also to all curious minds, regardless of educational and professional background. 190 pp. Englisch.
